

# **WALBOTTLE CAMPUS**

**offering opportunity - valuing achievement**

## **FACULTY OF DESIGN AND TECHNOLOGY**

### **Health & Social Care**

Required for September 2011 an enthusiastic and imaginative teacher of Health & Social Care to join this successful department within our new purpose built school. The department has excellent facilities and resources for use within the subject. You may also be required to teach in other subjects within the faculty e.g. Food Technology.

At Walbottle Campus students are offered the opportunity to study Health & Social Care & Child Development at Key Stages 4 & 5 at differing levels.

We currently teach:

- OCR Nationals in Health & Social Care at Level 1, Level 2 & Level 3.
- CACHE: Child Care & Education at Level 2
- 14-19 Society, Health & Development Diploma at Higher Level.

All courses offered have been developed to recognise learner's skills, knowledge and understanding of the health & social care sector and settings, job roles, principles and values involved. We cover a range of topics within the units taught. Therefore, knowledge of this sector is essential.

The department have an excellent success rate and is a popular subject choice for KS4 and KS5 students. We are looking for an individual who can work successfully as a team member helping to develop the department and contribute to its continued success.

ICT is seen as an important part of learning at Walbottle Campus. Our new school will benefit from excellent ICT resources, within each classroom and throughout the building. Each room will be equipped with an interactive whiteboard and all areas will have access to banks of laptops in mobile lap safes. Good ICT skills would therefore be an advantage within this role.
