

**FACULTY OF DESIGN AND TECHNOLOGY**  
**Health & Social Care**

At Walbottle Campus students are offered the opportunity to study Health & Social Care and Child Care & Education at Key Stages 4 & 5 at differing levels.

We currently teach:

- OCR Cambridge Nationals in Health & Social Care at Level 2.
- OCR Cambridge Technicals in Health & Social Care at Level 3.
- CACHE: Child Care & Education at Level 2

All courses offered have been developed to recognise learner's skills, knowledge and understanding of the health, social care and education sectors as well as the job roles, principles and values involved. We cover a range of topics within the units taught. Therefore, knowledge and experience of these sectors is essential.

The department has an excellent success rate and is a popular subject choice for KS4 and KS5 students. We are looking for an individual who can work successfully as a team member helping to develop the department and contribute to its continued success as well as someone who is proactive, self-motivated and enthusiastic. You will be a good communicator, passionate about improving skills and knowledge, raising aspirations and developing opportunities for learners.

ICT is seen as an important part of learning at Walbottle Campus. Our school benefits from excellent ICT resources, within each classroom and throughout the building. Each teaching room is equipped with an interactive whiteboard and all classroom areas have access to banks of laptops in mobile lap safes. Good ICT skills would therefore be an advantage within this role.
